Higher education in post-apartheid South Africa was always likely to attract academic interest, and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds. Using examples from higher education institutions across the Southern African Developing Community (SADC) region, this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions, and provides concrete recommendations for the future. The book is sure to appeal to academics from a variety of disciplines - from African, African American and ethnic studies to education and sociology. It will be of particular interest to teacher trainers, administrators and policy-makers working in higher education, and anyone else with a stake in managing cultural diversity in education.

Today's politicians and political groups devote great attention and care to how their messages are conveyed. From policy debates in Congress to advertising on the campaign trail, they carefully choose which issues to emphasize and how to discuss them in the hope of affecting the opinions and evaluations of their target audience. This groundbreaking text brings together prominent scholars from political science, communication, and psychology in a tightly focused analysis of both the origins and the real-world impact of framing. Across the chapters, the authors discuss a broad range of contemporary issues, from taxes and health care to abortion, the death penalty, and the teaching of evolution. The chapters also illustrate the wide-ranging relevance of framing for many different contexts in American politics, including public opinion, the news media, election campaigns, parties, interest groups, Congress, the presidency, and the judiciary.
