The Epson 7600 and 9600 ushered in the revolution in digital printmaking starting in 2003. No other machine has changed photography so much. The machines are still in operation today and many people use them for Piezography. We suggest you only buy a 7600 or 9600 that is in perfect operating condition. It's not worth the time and effort to resuscitate this machine from the dead for Piezography.

Chronicles the best and the worst of Apple Computer's remarkable story.

Addresses key issues in understanding the decade 2008-2018 and its impact on the societies of the future. Brings together the articles B28of twenty-two prestigious international experts in different fields of thought. Through an informative approach, the essays form a transversal view of today's thinking. This is the tenth title of the Open Mind essay collection published by BBVA.A27.0We are living through years of great importance, marked by the unstoppable evolution of technology, science and the information society. This book brings together twenty-two essays written by prestigious researchers from the world's leading universities on areas as diverse as crucial to our future: climate change, artificial intelligence, economics, cyber-security and geopolitics, democracy, anthropology, new media, astrophysics and cosmology, nanotechnology, biomedicine, globalisation, gender theory and the cities of the future.

doping technique for integrated circuits. Several series of conferences have dealt with the application of ion implantation to semiconductors and other materials (Thousand Oaks 1970, Garmisch-Partenkirchen 1971, Osaka 1974, Warwick 1975, Boulder 1976, Budapest 1978, and Albany 1980). Another series of conferences was devoted more to implantation equipment and techniques (Salford 1977, Trento 1978, and Kingston 1980). In connection with the Third International Conference on Ion Implantation: Equipment and Techniques, held at Queen's University, Kingston, Ontario, Canada, July 8-11, 1980, a two-day instructional program was organized parallel to an implantation conference for the first time. This implantation school concentrated on aspects of implantation-equipment design. This book contains all lectures presented at the International Ion Implantation School organized in connection with the Fourth International Conference on Ion Implantation: Equipment and Techniques, held at the Convention Center, Berchtesgaden, Germany, September 13-17, 1982. In contrast to the first school, the main emphasis in this school was placed on practical aspects of implanter operation and application. In three chapters, various machine aspects of ion implantation (general concepts, ion sources, safety, calibration, dosimetry), range distributions (stopping power, range profiles), and measuring techniques (electrical and non-electrical measuring techniques, annealing) are discussed. In the appendix, a review of the state of the art in modern implantation equipment is given.
